

## Multifunction transmitter C 310

### KEY POINTS

- 2 inputs for interchangeable probes
- 1 location for interchangeable SPI-2 board
- Simultaneous display of 1 to 4 parameters
- Trend indicator
- 4 visual (dual-color LEDs) and audible alarms
- 2 analogue outputs (4 wires) 0/5-10 V or 0/4-20 mA, 2 additional outputs (optional)
- 4-relay board (optional)
- 24 Vdc/Vac or 115/230 Vac power supply
- Outputs diagnostic
- Ethernet communication (optional)
- MODBUS network RS485 system (optional)
- ABS housing with stainless steel front, IP65, with or without backlit graphic display
- "¼ turn" system mounting with wall-mount plate

### FEATURES OF THE HOUSING

**Material:** ABS V0 as per UL94

**Protection:** IP65

**Display:** Graphic from 1 to 4 lines, 240 x 128 px;  
Size: 86 x 51 mm,  
Backlit

**Height of digits:** Values: 10 mm; Units: 5 mm

**Cable gland:** in polyamide for cables Ø9 mm maximum

**Weight:** 700 g

### PART NUMBERS

- **C310-BO** : multifunction transmitter, 24 Vac/Vdc power supply, with display
- **C310-BN** : multifunction transmitter, 24 Vac/Vdc power supply, without display
- **C310-HO** : multifunction transmitter, 115-230 Vac power supply, with display
- **C310-HN** : multifunction transmitter, 115-230 Vac power supply, without display

### TECHNICAL SPECIFICATIONS

<b>Power supply</b>	24 Vac / Vdc ±10% 100-240 Vac, 50-60 Hz <b>Warning: risk of electric shock</b> 
<b>Outputs</b>	2 x 0/4-20 mA or 2 x 0-5/10 V (4 wires) Optional additional outputs: 2 x 0/4-20 mA or 2 x 0-5/10 V (additional consumption for 24 V model: 1 VA / for 115-230 V model: 2 VA) Common mode voltage <30 VAC Maximum load: 500 Ohms (0/4-20 mA) / Minimum load: 1 K Ohms (0-5/10 V)
<b>Galvanic isolation</b>	Inputs (power supply) and outputs (on 115 Vac/230 Vac models) Device fully protected by DOUBLE ISOLATION or REINFORCED ISOLATION  Outputs (on 24 Vac/Vdc models)
<b>Consumption with probe and without option</b>	C310-BO and C310-BN: 6 VA C310-HO and C310-HN: 8 VA (CO2 probe additional consumption for 24 V and 115-230 V models: 2 VA)
<b>Relays (optional)</b>	4 RCR relays 5 A / 230 V (additional consumption for 24 V model: 5 VA / for 115-230 V model: 8 VA)
<b>European directives</b>	2014/30/EU EMC; 2014/35/EU Low Voltage; 2011/65/EU RoHS II; 2012/19/EU WEEE
<b>Electrical connections</b>	Screw terminal block for cables from 0.05 to 2.5 mm <sup>2</sup> or from 30 to 14 AWG Carried out according to the code of good practice
<b>RS485 communication (optional)</b>	Digital: Modbus RTU protocol, configurable communication speed from 2400 to 115200 Bauds
<b>Ethernet communication (optional)</b>	Ethernet communication module allowing transmission, monitoring and maintenance of transmitters via an Ethernet network in 10 BASE-T and 100 BASE-TX LAN/WAN supporting TCP/IP protocol (additional consumption for 24 V and 115-230 V models: 1 VA)

## TECHNICAL SPECIFICATIONS

<b>Audible alarm</b>	Buzzer (70 dB at 10 cm)
<b>Environment and type of fluid</b>	Air and neutral gases
<b>Conditions of use (°C/%RH/m)</b>	From -10 to +50°C. In non-condensing condition. From 0 to 2000 m
<b>Storage temperature</b>	From -10 to +70°C
<b>Security</b>	Protection class 2; Pollution degree 2; Overvoltage category 2

## RELAYS AND ALARMS

The **C 310** transmitter has 4 independent and configurable alarms : these are visual and audible alarms and it is possible to couple them with 4 relays (optional).

### Available settings:

- Selection of the parameter (pressure, air velocity, temperature,...)
- Time-delays duration from 0 to 600 s
- Alarm action : rising edge, falling edge, monitoring or state of the transmitter
- Operating mode of the relays : negative or positive safety (optional)
- Activation of the audible alarm (buzzer) that can be acknowledged by the front keypad (optional)

## CONNECTIONS

(c) For 24 Vdc/Vac power supply models:

or

(c) For 115 Vac or 230 Vac power supply models:

(d)

## ELECTRICAL CONNECTIONS – as per *NFC15-100 Norm*

 This connection must be made by a formed and qualified technician. Whilst making the connection, the transmitter must not be energized. The presence of a switch or a circuit breaker upstream the device is compulsory.

> For 24 Vdc power supply models:

> For 115 Vac or 230 Vac power supply models:

> For 24 Vac power supply models:

or

> 0/4-20 mA current output connection:

> 0-5/10 V voltage output connection:

## POSSIBLE OPTIONAL MEASUREMENTS

The following probes and boards are available as option for C310 transmitters. For further details please see the technical datasheet of probes for class 310 transmitters.

Probes	Measuring ranges
Stainless steel or polycarbonate hygrometry / temperature probe	From 0 to 100%RH and from -40 to +180°C (according to probe)
Air velocity vane probe: air velocity / temperature / airflow	From -5 to 35 m/s (according to probe) / From -20 to +80°C / From 0 to 99 999 m³/h
Air velocity hotwire probe: air velocity / temperature / airflow	From 0 to 30 m/s / From -20 to +80°C / from 0 to 99 999 m³/h
Omnidirectional probe: air velocity / temperature	From 0 to 5 m/s and from 0 to 50°C
Pt100 1/3 DIN temperature probe	From -50 to +180°C / From -20 to +80°C
CO / temperature probe	From 0 to 500 ppm and from 0 to 50°C
CO <sub>2</sub> / temperature probe	From 0 to 20 000 ppm and from 0 to 50°C
Boards	Measuring ranges
Pressure / atmospheric pressure	From -100 to +10 000 Pa (according to boards) / from 800 to 1100 hPa
Relays	4 relays 3 A with 3-point terminal blocks

## RS 485 MODBUS PROTOCOL (optional)

Class 310 transmitters can be linked in one network operating on a RS485 home bus.

The RS 485 digital communication is a 2-wire network, on which the transmitters are connected in parallel. They are connected to a PLC/BMS via the RTU Modbus communication system. Since the C310 can be configured with the keypad, the MODBUS enables remote configuration, to measure 1 or 2 parameters or to see the status of the alarms...

---

## ETHERNET BOARD (optional)

---

An Ethernet board can be put on a C310 transmitter allowing for each transmitter to have a specific configurable IP address. So the user can remotely interrogate the transmitter, retrieve data, modify the configuration, ...

It is also possible to integrate C310 transmitters into a computer network via the RJ45 connection located at the bottom of the transmitter.

---

## CONFIGURATION

---

Class 310 transmitters allow you to set all the parameters managed by the transmitter : units, measuring ranges, alarms, outputs, channels... via the different methods shown below:

- > **Via keypad**, only on models with display. A code-locking system for keypad guarantees the security of the installation. See configuration manual.
  - > **Via software (optional)**: simple and user-friendly. See LCC-S user manual.
  - > **Via Modbus (optional)**: configuration of all parameters from your PC, via the supervision or data acquisition software.
  - > **Via Ethernet (optional)**: configuration of all parameters from your PC, via the supervision or data acquisition software.
- 

## MOUNTING

---

To install the transmitter on a wall, fix the stainless steel plate to the wall (drilling: Ø8 mm, screws and wall-plugs supplied).

Insert the transmitter on the plate (see A on the drawing below) by aligning it at 30°. Rotate the housing in clockwise direction until you heard a "click" which confirms that the transmitter is correctly installed. Open the housing, lock the clamping system of the housing on the plate with the screw (see photo below).

To remove the transmitter from the fixing plate, do not forget to remove this screw.

---

## CALIBRATION

---

**Outputs diagnostics:** with this function, you can check with a multimeter (or on a regulator/display, or on a PLC/BMS) if the transmitter outputs work properly. The transmitter generates a voltage of 0 V, 5 V and 10 V or a current of 0 mA, 4 mA, 12 mA and 20 mA

**Certificate:** transmitters are supplied with an individual adjusting certificate and can be supplied with a calibration certificate as an option.

---

## MAINTENANCE

---

Avoid aggressive solvents. When cleaning rooms or ducts with products containing formol, protect the transmitter.

---

## OPTIONS

---

- **LCC-S:** configuration software with USB cable
- **SQR/3 function:** (square root extraction) function for the calculation of air velocity and airflow
- **RS5:** RS 485 Protocol Modbus digital output
- **O2S:** 2 additional analogue output
- **C4R:** 4 relays board
- **CETHE:** Ethernet network board
- **HRP:** high resolution (example in pressure: 0.1 Pa) with SPI2-100 board
- **Calibration certificate**

**Only the accessories supplied with the device must be used.**

---

## PRECAUTIONS FOR USE

---

Please always use the device in accordance with its intended use and within parameters described in the technical features in order not to compromise the protection ensured by the device.

Once returned to KIMO, required waste collection will be assured in the respect of the environment in accordance with European guidelines relating to WEEE.
